Pesaro
October 28 - 31, 2015

PRACTICAL APPROACH TO PROSTHETIC REHABILITATION
Clinical and laboratory steps in everyday practice

▷ Hands-on course with theoretical sessions
▷ Max. 14 participants
▷ Saturday October 31, session open also to Dental Technicians

Speakers
Dr. Mauro Fradeani
Dr. Leonardo Bacherini
M.T. Giancarlo Barducci
SPEAKERS

Dr. Mauro Fradeani

Mauro Fradeani, DMD, completed a specialization in Dentistry at the University of Ancona, Italy in 1983. Past president of EAED – European Academy of Esthetic Dentistry (biennial 2003-2004), Past President AIOP – Accademia Italiana di Odontoiatria Protesica (biennial 1999-2000), Visiting Associate Professor in Prosthetics at Louisiana State University - New Orleans (USA) from 1999 until 2008. He is author of the book “Esthetic Rehabilitation in Fixed Prosthodontics” - Vol. 1 and 2, and of several articles published in international scientific magazines. He is an active speaker for many conferences both in Italy and abroad on esthetics in fixed prosthodontics and implants. He runs a private practice limited solely to prosthetics in Pesaro (Italy).

Dr. Leonardo Bacherini

He graduated as dental technician at the Istituto Tecnico Leonardo Da Vinci in Florence in 1988. Degree in Dentistry at the University of Florence in 1995. He attended several specialization courses on Prosthetics and Implants with the most important clinicians in Italy and around the world. He collaborates with the most famous dental technicians in the world. He has participated as a speaker in national and international conferences and collaborates with Dr. Fradeani at ACE Institute where he is Master Tutor.

M.T. Giancarlo Barducci

He started working as a Technician in his laboratory in 1974. He is a Founder of AITLO and ANTLO. Past President of the Dental Technician sector (biennial 1999-2000) and Associate of the Accademia Italiana di Odontoiatria Protesica (AIOP). He is a speaker for several courses and congresses both in Italy and abroad. He is author with Dr. Mauro Fradeani of the book “Esthetic rehabilitation in fixed prosthodontics” - Volume 2 - “Prosthetic Treatment” edited by Quintessence International. He has enhanced his experience in prosthetic rehabilitations on natural dentition and implants, and has specialized in the field of metal-free ceramics.

ACE Institute

The ACE Institute, Advanced Continuing Education Centre, was created in 2000 with the aim of expanding clinical knowledge and sharing professional skills and scientific update in esthetic dentistry. The course facility is located in Pesaro, Italy. It can accommodate up to 30 participants. The professional Full-HD audio-visual equipment allows optimal interface during live-treatments and recording of all the clinical procedures as well as easy connection with Dr. Fradeani’s dental office located just next door. The second floor offers 14 lab stations for hands-on courses. Availability of Internet wi-fi connection and simultaneous translation upon request.
The aim of the course is to examine all the aspects of diagnosis and formulation of the treatment plan from simple to complex cases of prosthetic rehabilitation. The speakers will describe and analyze in-depth all the protocols that they follow, both from a clinical and laboratory viewpoint. Great part of the course will be dedicated to hands-on sessions on these clinical protocols, with specific attention on the data collection thanks to the correct use of photography and image management programs, and on the procedures of data transfer from the clinic to the laboratory by using the new technologies. The involvement of the dental technicians in the Sunday session will give the opportunity to the speakers to describe and discuss the laboratory procedures that are useful in the formulation of diagnosis, treatment plan and for the fabrication of the provisional restorations, which are the key point in prosthodontics.

The application of a systematic approach to the prosthetic rehabilitation, by following a precise protocol, is necessary in order to reach an esthetic, biologic and functional integration of the restoration both in simple and in complex cases. The first step is a correct data collection and organization (interview, pictures, videos, impression taking, occlusal records, facebow records, x-rays, stone models). It is also very important to know how to use the new communication tools, for example Keynote or PowerPoint, for a more efficient exchange of information between the clinic and lab and a better communication with the patient. We will learn how to formulate an appropriate diagnosis and treatment plan thanks to the application of a correct protocol of data collection by using pictures and videos. Once all the esthetic and functional information have been collected, it is important to be able to differentiate precisely the cases to be treated according to the confirmatory approach or the reorganizational approach. When deciding to follow the reorganizational approach, it is very important for the clinician to be able to re-establish the correct functional parameters, mostly by using the selective grinding technique, that is still not so much used by many dentists. One of the key elements in prosthodontics is the correct use of the provisional, which, if made on the base of a correct protocol, will allow the clinician to restore the correct esthetic and functional parameters and to save time during the treatment. Finally, in order to guarantee the longevity of the prosthetic restorations and, at the same time, to reach an optimal esthetic result, it is important to understand how to correctly use the last generation ceramic materials considering also those details that are often ignored by the dentists and the dental technician in everyday practice.

COURSE PROGRAM

DAY 1

Theoretical session:
- Introduction to esthetic and functional analysis

Hands-on training by the course participants on the patient:
- Compilation of the esthetic and laboratory checklists

Theoretical session:
- Photography in dentistry: basic principles

Hands-on training by the course participants:
- Camera settings
- Photo shooting: clinical and laboratory protocols

DAY 2

Theoretical session:
- Occlusal records and setting of the articulator for the clinical case

Hands-on training by the course participants (working one on the other):
- Facebow records, centric and protrusive wax records of the mouth of all the participants
- Mounting in the articulator of the models of the participants with the facebow, the centric relation record, the protrusive wax, setting of the articulator

Theoretical session:
- Selective grinding on patients: how, when and why
- Selective grinding: step-by-step procedure

Hands-on session by the course participants on dental models provided by the speaker:
- Mounting in the articulator and selective grinding on the model following the step-by-step procedure explained during the theoretical session

NECESSARY EQUIPMENT

DAY 1

- SLR (Single Lens Camera) digital camera
- Macro Lens 105mm, or, alternatively, 60mm
- Wireless flash or ring flash for macro photography
- 2 couples of retractors for intraoral photography (full and cut)
- 1 mirror for intraoral occlusal photography
- 1 mirror for intraoral lateral photography (flexipalette)
- Laptop computer with cable for data transfer from the camera (or card reader)

DAY 2

- Semi-adjustable articulator with facebow and setting keys
- 2 pairs of plates for the mounting of the models in the articulator
- 1 bur (es. Komet Ref. 368 314016 - ISO 806 314 2676 24016)
- Spatula and cup for plaster
- Trimmed stone casts of the mouth of the participants
- Magnifying glass usually used in the clinic

A complete list of the specific material used by Dr. Fradeani and Dr. Bacherini will be given upon request

No specific material will be requested on Friday and Saturday
DAY 3

Live demonstration by Dr. Fradeani on a patient
- Selective grinding

Theoretical session:
- Timing of the prosthetic treatment, from simple cases to complex rehabilitations
- How to present a clinical case: preparation of presentations with Keynote or Power Point

Hands-on session by the course participants:
- Formulation of treatment plans on complex clinical cases provided by the speaker
- Discussion with the speaker about the treatment plans formulated by the participants.

DAY 4  SESSION OPEN ALSO TO DENTAL TECHNICIANS

Theoretical session:
- The provisional in fixed prosthodontics: clinical and laboratory aspects

Hands-on demonstration by the Dental Technician Giancarlo Barducci:
- The different methods of provisional fabrication by using the MIT technique
- How to manage the clinic and laboratory phases during the cross-mounting procedure
- Creation of a all-ceramic crown: from the design of the dental coping to the layering of the covering ceramic
HOTELS IN PESARO

Pesaro is a popular seaside resort on Italy’s Adriatic Coast with a population of around 100,000. The ACE Institute is located in the historic centre of the city which is only a few minutes’ walk from the seafront.

All the hotels mentioned below apply corporate rates to our course participants, so you are kindly invited to mention the ACE Institute or Dr. Fradeani’s name when making your reservation.

For any further information on the offered services and on prices, please visit the websites of the hotels.

HOTEL EXCELSIOR ★★★★★
Lungomare Nazario Sauro
Tel.: +39 0721 32 720 - Fax: +39 0721 35 502
email: info@excelsiorpesaro.it - www.excelsiorpesaro.it
Distance from the ACE Institute: 950 mt

HOTEL VITTORIA ★★★★★
2, p.le della Libertà 61121 Pesaro (PU)
Tel.: +39 0721 34343 - Fax: +39 0721 65204
email: vittoria@viphotels.it - www.viphotels.it
Elegant and refined hotel, centrally located
Distance from the ACE Institute: 650 mt.

CRUISER CONGRESS HOTEL ★★★★
281, vl. Trieste 61100 Pesaro (PU)
Tel.: +39 0721 3881 - Fax: +39 0721 388 600
email: cruiser@cruiser.it - www.cruiser.it
Distance from the ACE Institute: 620 mt.

HOTEL SAVOY ★★★★★
22 vl. della Repubblica, 61121 Pesaro (PU)
Tel.: +39 0721 674 40 - Fax: +39 0721 644 29
email: savoy@viphotels.it - www.hotelsavoypesaro.it
Distance from the ACE Institute: 650 mt.

Please be aware that these hotels offer some special rates through their online booking as well and sometimes these rates are even more convenient than the corporate ones. These offers are usually reserved to a particular period of time or to a specific room typology, but they also apply a different cancellation policy.

We suggest the course participants to take their time to check both possibilities (directly with the hotel by mentioning that they will participate to Dr. Fradeani’s course), and also via the online booking, in order to find the best price. Should you need any assistance with hotel reservation, please let us know and we will be happy to help you.

For any alternative hotel solution:
ASSOCIAZIONE PESARESE ALBERGATORI - A.P.A. HOTELS srl
10, p.le della Libertà 61121 Pesaro (PU)
Tel: 0721 67959 - Fax: 0721 651 35
email: info@apahotel.it - www.apahotel.it

HOW TO REACH US

Pesaro is well connected by train with the following international airports: Ancona (45 minutes), Bologna (1h30), Milano (3h30 hours) and Roma (3h30). Timetables and train connections are available on www.trenitalia.com

If you are planning to rent a car, the distance from major airports to Pesaro is the following: from Ancona: 55 kms, from Bologna: 135 kms, from Milano: 350 kms, from Roma: 370 kms.

Should you wish to have a transfer organized from/to the airport by car, we recommend “Chiuselli” a very reliable local company in Pesaro with English speaking drivers. Contact information or cost estimate available on their website www.chiuselli.com.
REGISTRATION FORM

Please send this form either by fax (+39 0721 64359) or by e-mail (ace@maurofradeani.it)

TESTIMONIALS

Thank you so much for your wonderful lecture and time you spent with our China team.

Young-Chui Kwon

It has been a pleasure to attend your course. You have showed me a new horizon in Dentistry. Many thanks to be that generous and to show us everything about your amazing work.

Sarah Sirvent Mestre
